

Daniel Van Cuylenburg

Front-end Developer from the Isle of Wight who specialises in React, Remix, NextJS and Tailwind CSS.

A self taught, front end developer and React engineer with over 20 years experience in the industry. Working alongside some globally established brands for small - medium sized businesses, in house digital teams and freelancers, delivering performant websites and web apps.

Both an independent worker and team member, whom possesses excellent communication and organisational skills, and continuously demonstrates high commitment, enthusiasm and drive to deliver and meet business goals and objectives.

Employment History

Senior Front-end Developer, Amigo Partnership

OCTOBER 2021 – PRESENT (Remote)

Building front-end website and app like interfaces with React, NextJS, Remix, Tailwind CSS, Craft CMS, AWS, Heroku and Vercel as part of a digital design and dev agency, in London, UK. Most recent projects included a web app style, educational style system which offered small elements of gamification. Amigo Partnerships new website to fit their re-brand, and working with an existing client to integrate a Carbon Calculator system, glossary and press pages - this work involved learning the client's internal data logic and system architecture. All project work included using a mix of Heroku, Vercel and Github for sharing pieces of work and collaborating reviews amongst team members and clients.

Senior Front-end Developer, Apacio

AUGUST 2020 – SEPTEMBER 2021 (Remote)

Building front-end interfaces with React, NextJS, Apollo and styled-components as a digital dev agency for various medium sized clients. Mentoring Junior dev's. Improving the team's tech stack and current working methods and tooling. Offering advice and sharing new found knowledge.

Front-end Developer, Ellen MacArthur Foundation

NOVEMBER 2015 – AUGUST 2020 (Remote / hybrid)

To build on and leverage the existing front-end architecture and design across their existing web sites, while implementing agile methodologies. Improve and modernise their existing tech stack. And offer support to the design team.

Web Designer and Front-end Developer, BoxStuff Ltd

MAY 2014 – OCTOBER 2015

To build the front-end architecture and styling of their new and existing web sites for local businesses, using BoxStuff's in-house Ruby on Rails web app. And to design and build a new web app templating platform.

Web Developer, OC Vision / OC Sport

JANUARY 2007 – APRIL 2014

Implement & maintain several CMS systems (in ExpressionEngine) and develop the front-end architecture and styling of all their digital projects. I then also took on responsibility of designing some of their new / existing web sites.

Web Developer, Wight365

JANUARY 2006 – JANUARY 2007

Web Developer (Apprentice), InTouch Group plc
